Terrestrial biomes lend well to this, and students are sure to be excited about the prospect of creating a biome model. You can go about this activity in a few different ways depending on the ...

Terrestrial Biome Activities | Study.com

The study of the distribution of plants is the science of plant geography. The units of vegetation the plant geographers study vary in size from the basic community, to groups of communities and their environment—ecosystems—to assemblages of ecosystems with distinctive vegetation and growth forms that extend over large geographic areas— biomes.
